SUMMARY

Software developer with 4+ years building production mobile and web systems for enterprise teams and community-facing products. Experienced across Flutter, React, ASP.NET Core, Node.js, and Kotlin. I ship reliable software for marketplaces, logistics, tax systems, visitor management, and local businesses — using AI-assisted development to move from idea to production quickly without sacrificing architecture quality.

EXPERIENCE

Software Developer — Persol Systems

Present

Enterprise mobile and web products across logistics, tax systems, visitor management, and internal operations.

- Build production Flutter and native Android apps for field and enterprise workflows
- Develop ASP.NET Core APIs, SQL Server backends, and secure authentication layers
- Deliver offline-capable mobile features, integrations, and deployment-ready releases

Founder & Lead Developer — Dev's Consult

Present

Client projects and end-to-end product delivery for startups and small businesses.

- Led delivery of Frankates Marketplace — multi-role e-commerce platform for local vendors
- Shipped hostel management, church management, loan tracking, and logistics products
- Own architecture, mobile/web development, API design, and client delivery

EDUCATION

BSc Computer Engineering — Ghana Communication Technology University (GCTU)

2024

Focused on software engineering, mobile development, and building practical systems for real-world use.

SELECTED PROJECTS

Frankates Marketplace — Flutter + ASP.NET Core multi-vendor marketplace with customer, vendor, driver, and admin apps.

GRA eVAT Mobile — Enterprise tax and e-invoicing mobile solution for Ghana Revenue Authority workflows.

ChurchOS — Flutter church management app with attendance, giving, events, and admin dashboards.

HostelHub Suite — Flutter mobile booking app, web admin portal, and Node.js/MongoDB API.

Lend Ledger — Flutter loan management app with ASP.NET Core 8 API and SQL Server.
